#### **DETAILED ACTION**

### Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-29 are provisionally rejected under the judicially created doctrine of double patenting over claims 126-130, 207-21, 236-241, and 221-235 of copending Application No. 09/921,851. The claims correspond as follows:

<u>Application 10/808,852</u>	<u>Application 09/921,852</u>		
Claims 1-8 - correspond to -	Claims 126-130, & 207-210		
Claims 9-14 - correspond to -	Claims 236-241		
Claims 15-29 - correspond to -	Claims 221-235		

This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of application 09/921,852 "anticipate" the claims of application 10/808,852 as shown above. Accordingly, application claims 1-29 are not patentably distinct

Page 3

Art Unit: 3726

from application 09/921,852. Since it is clear that the more specific claims of 09/921,852 encompasses the claims of the instant application, following the rationale in *In re Goodman* cited in the preceding paragraph, where applicant has once been granted a patent containing a claim for the specific or narrower invention, applicant may not then obtain a second patent with a claim for the generic or broader invention without first submitting an appropriate terminal disclaimer.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 15-29 are rejected under 35 U.S.C. 102(e) as being anticipated by Paul et al. (US Patent No 6258125).

Regarding claim 15 & 16, Paul et al discloses a method of forming an implant including the step of milling (see column 4, line 54) and forming a plurality of surface projections on upper and lower surfaces said projections having a forward facet, rearward facet, and two side facets, wherein the forward facet is longer and rearward facet has a steeper slope and an angle greater than 90 degrees. See figures 9 and 10A, which are interpreted as having said four facets.

Regarding claims 17-24, Paul et al. discloses the facets having the claimed configuration as illustrated in Figures 1-7, & 9-10.

Art Unit: 3726

### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 25-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Paul et al.

Paul et al. discloses the claimed invention except for the specific embodiments claimed. It would have been an obvious matter of design choice to form the facets with the specific configuration as claimed, since applicant has not disclosed that such a configuration is for any particular purpose, or solves any stated problem. Furthermore, it appears as if the facets of Paul would perform equally well.

#### Conclusion

The prior art made of record on the attached PTO-892, and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen J Kenny whose telephone number is 703-306-0359. The examiner can normally be reached on mon - fri 9am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Vo can be reached on 703-308-1789. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
